Package Size: 20kg in a plastic-lined corrugated cardboard box.

Product Description: Hubberts Pure Beef Dripping™ is a legacy product that has been made the same way for over 100 years. When a beef roast is cooked in the oven, beef fat is rendered from the meat. This fat collects in the bottom of the roasting pan and imparts a distinct flavour to the food. Hubberts Pure Beef Dripping is made this way by heating beef fat and recovering the rendered tallow. It cooks and improves the flavour of fish fillets, chicken fingers, pork cutlets, potatoes and vegetables. The dripping is lightly filtered so the fat is a pale, golden brown. It still carries a hint of beef flavour and aroma when heated and remains heat stable, therefore reducing the frequency of frying oil changes. No other ingredients are added so it is a clean label product.

Quality Assurance: BBSI has in place quality assurance programs that strictly maintain the specifications and wholesomeness of their finished products. BBSI holds license 9HPV4T74 under the Safe Food for Canadians Act (SFCA) and Safe Foods for Canadians Regulations (SFCR), and has a HACCP system to comply with all government regulations and industry best practices ensuring the continued safety of our products. BBSI has obtained certification under an approved Global Food Safety Initiative (GFSI) Standard from the British Retail Consortium (BRC) and the Food Safety Modernization Act (FSMA) Module.

Regulatory Compliance: This product is not considered Kosher, Halal or Organic.

Microbiology: Pure fats are not attacked by microbiological species, since there must be a nutrient-containing aqueous phase in which the organism can grow. The moisture content of this product is below 0.1%, and at this moisture level product will not support any microbial growth.

Handling and Storage: Care must be taken during storage and shipment to avoid damaging the flavor. BBSI recommends during shipping Hubberts Pure Beef Dripping is kept below 90°F (32°C) and above 40°F (5°C). During warehouse or kitchen storage, BBSI recommends Hubberts Pure Beef Dripping is kept between 65°F and 85°F (18°C-29°C). Packaged animal fats will absorb off-flavors if stored near food items with strong odors. Unsaturated fatty acids will oxidize if kept in a warm place over a long period of time.

Country of Origin: Canadian sources from federally inspected meat processing facilities.

Shelf life: One year after packing date. The shelf life will be affected by storage conditions such as temperature, humidity and light. BBSI recommends Hubberts Pure Beef Dripping is stored at 65°F-85°F (18°C-29°C) and away from heat sources such as griddles and deep fryers.

Ingredients: Filtered beef tallow.

Physical/Chemical Analyses: Free Fatty Acid (FFA) = 0.25% max; Qualitative Moisture = Negative;
Peroxide Value (PV) = 1.0 meq/kg max; Solid Fat Index = N/A;
Lovibond Color Yellow/Red = 20/2.0; Melting Point = N/A
Iodine Value = 38-47;
