

# bakers lard™

Equally useful for baking and frying needs

**bank brothers**  
sustainable ingredients

**Package Size:** 20kg in a plastic-lined corrugated cardboard box.

**Product Description:** Bakers Lard™ can be used for baking, deep frying and making Mexican foods such as tortillas. As with our Canadian Premium Lard™, the fat is sourced in Canada and refined and deodorized to enhance the flavour of the foods being prepared. As with all of our pure lard-based products, there are zero trans-fats. When baking, it promotes flakiness in pie shells and pizza crusts. As a deep-frying fat, it is similar to beef fat in its ability to enhance the flavours of the food being cooked. Bakers Lard contains antioxidants to promote a longer frying life.

**Quality Assurance:** BBSI has in place quality assurance programs that strictly maintain the specifications and wholesomeness of their finished products. BBSI holds license 9HPV4T74 under the Safe Food for Canadians Act (SFCA) and Safe Foods for Canadians Regulations (SFCR) and has a HACCP system to comply with all government regulations and industry best practices ensuring the continued safety of our products. BBSI has obtained certification under an approved Global Food Safety Initiative (GFSI) Standard from the British Retail Consortium (BRC) and the Food Safety Modernization Act (FSMA) Module.

**Regulatory Compliance:** This product is not considered Kosher, Halal or Organic.

**Microbiology:** Pure fats are not attacked by microbiological species, since there must be a nutrient-containing aqueous phase in which the organism can grow. The moisture content of this product is below 0.1%, and at this moisture level product will not support any microbial growth.

**Handling and Storage:** Care must be taken during storage and shipment to avoid damaging the flavor. BBSI recommends during shipping Bakers Lard is kept below 90°F (32°C) and above 40°F (5°C). During warehouse or kitchen storage, BBSI recommends Bakers Lard is kept between 65°F and 85°F (18°C-29°C). Packaged animal fats will absorb off-flavors if stored near food items with strong odors. Unsaturated fatty acids will oxidize if kept in a warm place over a long period of time.

**Country of Origin:** Canadian sources from federally inspected meat processing facilities.

**Shelf life:** One year after packing date. The shelf life will be affected by storage conditions such as temperature, humidity and light. BBSI recommends Bakers Lard is stored at 65°F-85°F (18°C-29°C) and away from heat sources such as griddles and deep fryers.

**Ingredients:** Deodorized lard with BHA, BHT and citric acid added as an antioxidant to help protect flavour.

**Physical/Chemical Analyses:** Free Fatty Acid (FFA) = 0.05% max; Qualitative Moisture = Negative;  
Peroxide Value (PV) = 1.0 meq/kg max; Solid Fat Index = N/A;  
Lovibond Color Yellow/Red = 15/1.5; Melting Point = N/A  
Iodine Value = 58-72;
